Edible Forest Gardens is a groundbreaking two-volume work that spells out and explores the key concepts of forest ecology and applies them to the needs of natural gardeners in temperate climates. In Volume II, Dave Jacke and Eric Toensmeier take the vision of the forest garden and basic ecological principles from Vol. I and move on to practical considerations: concrete ways to design, establish, and maintain your own forest garden. Along the way they present case studies and examples, as well as tables, illustrations, and a uniquely valuable "plant matrix" that lists hundreds of the best edible and useful species.

Bowling uses her twenty years of personal experience and professional expertise to illuminate the art and science of growing strawberries, brambles (including raspberries and blackberries), blueberries, grapes,

and a host of minor small fruits such as kiwi, currants, and gooseberries. A chapter is devoted to each of the main berry types and includes cultural requirements, botanical traits, the history of the plant in cultivation and in commerce, appropriate cultivars for each region of the United States, and pest and disease considerations. Because berry fruits are all too often ignored for their aesthetic and practical benefits, Bowling includes a chapter on their contributions to the garden landscape. Full of good humor and infectious enthusiasm, Bowling discusses practical considerations (What soils do the plants require? Which cultivars are best for a given site?) as well as philosophical concerns (What can we learn by growing food crops? What approach should we take with regard to pesticide use?).

Horticultural Reviews presents state-of-the-art reviews on topics in horticultural science and technology covering both basic and applied research. Topics covered include the horticulture of fruits, vegetables, nut crops, and ornamentals. These review articles, written by world authorities, bridge the gap between the specialized researcher and the broader community of horticultural scientists and teachers.
