Créé en 1983 par l'Association américaine des techniciens médicaux d'urgence (NAEMT) et le Collège américain des chirurgiens, le PHTLS (Prehospital Trauma Life Support) représente la version préhospitalière de la célèbre formation ATLS (Advanced Trauma Life Support). Fondé sur le concept de l'évidence based medicine et mis à jour tous les quatre ans, il constitue une ressource d'informations globale pour la gestion des patients traumatisés en pratique préhospitalière. Cet ouvrage, traduction de la 6<sup>e</sup> édition américaine du PHTLS, devenu un ouvrage de référence internationale, privilégie l'efficacité par son approche pédagogique originale. Il permet aux intervenants d'affiner leur capacité à évaluer rapidement et précisément l'état de gravité d'un patient, puis de développer une stratégie thérapeutique selon le principe du "traiter en premier ce qui tue en premier". Une importance particulière est accordée à l'anatomie, la physiologie et la physiopathologie, ainsi qu'à l'évaluation et la prise en charge des différents types de traumatismes. Cette nouvelle édition, qui intègre désormais des modifications et enrichissements en lien avec les pratiques françaises, comprend : des cahiers illustrant étape par étape les techniques de gestion des voies aériennes, de ventilation et de stabilisation du rachis ; des algorithmes et iconographies relatifs à l'évaluation du patient et à sa prise en charge. Entièrement actualisée et largement enrichie, elle offre au lecteur 5 nouveaux chapitres concernant : les brûlures ; la gestion des catastrophes ; les armes de destruction massive ; la tactique civile de soutien médical d'urgence ; le secours en milieu isolé. Cet ouvrage intéresse tous les intervenants impliqués dans les situations d'urgence préhospitalières, particulièrement les médecins, infirmiers, sapeurs-pompiers, ambulanciers et secouristes.
