Starting Out: The Accelerated Dragon is a further addition to Everyman's best-selling Starting Out series, which has been acclaimed for its original approach to tackling chess openings. International Master Andrew Greet, an Accelerated Dragon expert, revisits the fundamentals of the opening, elaborating on the crucial early moves and ideas for both sides in a way that is often neglected in other texts.

The Sicilian Accelerated Dragon (1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 g6) is one of the most exciting and enduring openings known to the modern chessplayer. After decades of use, the razor-sharp move has recently had a strong revival, and this book brings together previously inaccessible new material on the opening. The authors examine all significant developments within all of the lines that encompass the Accelerated Dragon, including the intriguing Hyper-Accelerated Dragon and the obscure Semi-Accelerated Dragon. Numerous new ideas and improvement of existing theory (as well as many places of original analysis) make this essential for both Black and White players wishing to arm themselves in competitive play.

Many players are attracted to the Dragon Sicilian, but are put off by the fierce mating attacks that White can launch. In the Accelerated Dragon, Black aims for an improved version, saving a move with his queen's pawn. If White tries to ignore the difference, Black's instant detonation of the centre will come as an unwelcome cold shower! The authors show that White's main reply, the Maroczy Bind, is not so fearsome as was once thought. Black has many ways to break out, while quite often it is possible to manoeuvre around White's 'binding' pawns and show that they imprison White's pieces as much as they do Black's. Written by two outstanding experts on the Accelerated Dragon, this book offers complete coverage of all lines of the Accelerated Dragon and many ideas for breaking the critical Maroczy Bind. International Master John Donaldson is Associate Editor of the acclaimed magazine inside Chess (Seattle). He is the author of several books, including theoretical opening works and painstakingly researched player biographies. He plays regularly and successfully in North American tournaments. International Master Jeremy Silman is co-author (with Yasser Seirawan) of Microsoft Press's series of chess books, and author of several openings books. (320 pages, 5 3/4" X 8 1/4")

The Accelerated Dragon remains one of Black's most popular choices in the Sicilian, and the attractions are obvious. Black's opening strategy is easy to understand, and his pieces are quickly developed on active squares. Furthermore, White players hoping to attack in the same way as against the traditional Dragon will be shocked by the Accelerated Dragon's greater flexibility and possibilities for a swift counterattack. In this book, Peter Lalic presents a repertoire for Black based on this line. He outlines a reliable system of development with the aim of choosing clear, consistent plans. Firstly, he demonstrates why the Accelerated Dragon exponent need not fear the Yugoslav Attack. Secondly, if White chooses instead the Maroczy Bind approach he emphasizes that positional understanding is far more important than memorization of move sequences. He studies the thematic middlegame and endgame positions which may arise and answers all the frequently asked questions. This book tells you everything you need to know to play the Accelerated Dragon with confidence. *An Accelerated Dragon repertoire for Black *Packed with new ideas and critical analysis *Covers Black's key tactics and strategies

"In science fiction there is only a handful of books that stretch the mind—and this is one of them."—Arthur C. Clarke In a moving story of sacrifice and triumph, human scientists establish a relationship with intelligent lifeforms—the cheela—living on Dragon's Egg, a neutron star where one Earth hour is equivalent to hundreds of their years. The cheela culturally evolve from savagery to the discovery of science, and for a brief time, men are their diligent teachers. Praise for Dragon's Egg "Bob Forward writes in the tradition of Hal Clement's Mission of Gravity and carries it a giant step (how else?) forward."—Isaac Asimov "Dragon's Egg is superb. I couldn't have written it; it required too much real physics."—Larry Niven "This is one for the real science-fiction fan."—Frank Herbert "Robert L. Forward tells a good story and asks a profound question. If we run into a race of creatures who live a hundred years while we live an hour, what can they say to us or we to them?"—Freeman J. Dyson "Forward has impeccable scientific credentials, and . . . big, original, speculative ideas."—The Washington Post

The governments of China and the United States - despite profound differences in history, culture, economic structure, and political ideology - both engage the private sector in the pursuit of public value. This book employs the term collaborative governance to describe relationships where neither the public nor private party is fully in control, arguing that such shared discretion is needed to deliver value to citizens. This concept is exemplified across a wide range of policy arenas, such as constructing high speed rail, hosting the Olympics, building human capital, and managing the healthcare system. This book will help decision-makers apply the principles of collaborative governance to effectively serve the public, and will enable China and the United States to learn from each other's experiences. It will empower public decision-makers to more wisely engage the private sector. The book's overarching conclusion is that transparency is the key to the legitimate growth of collaborative governance.
